

## Monoreto Social Network

Revolutionary social media platform with the monetization of likes

### Main distinction

Traditional social media platforms (*blog services, social networks, photo-hostings etc.*) earn money from the advertising campaigns leaving the users behind. Ordinary users as main producers of content, thus, are losing the motivation to publish unique and interesting content. As a result, their newsfeeds contain more and more 'commercial information', 'sponsored posts' etc. Only top rated bloggers can earn any significant reward for their content.

Monoreto Social Network can break this vicious circle.

**Centralized social networks steal your time and advertisers' funds. Monoreto helps you to monetize your social impact.**

### How do we plan to achieve this goal?

Every like in Monoreto worth 0.05 USD in the MONO tokens equivalent

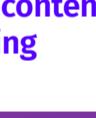

Every post is ranked via smart newsfeed algorithms - only interesting and useful content at the top

Every user receives his share from the project monetization

Every type of content is supported - videos, photos, stories etc

Every entrepreneur can promote his content via MONO tokens

**Unique interface**

**Clear and prudent system of content ranking**

**Smart newsfeed**

**Your content  
Can be your source of income**

### Standalone Token Solution by MONORETO

#### Investment token - MNR

MNR belongs to the ERC-20 type as it can be exchanged for all ERC-20 tokens natively through the vast majority of popular DEXs and CEXs. Also, those who are interested in the project, have the unique opportunity to buy the tokens. We have already sold 17M out of 22M tokens issued during the first round of pre-sale. All the information about the token is available via public smart contract: 0x5f824733d130Ad85EC5e180368559CC89D14933D

#### Application utility tokens - MONO

MONO token is launched on the Waves platform - Russia-based blockchain with the extremely comfortable interface and low fees. It can be also used for the project services reward. Also, if you want to trade the MONO token, you can easily exchange it directly on our site for the MNR token in 1:1 proportion

### BUY MNR TOKEN:

### DON'T MISS THE SECOND ROUND OF PRE-SALE AND ICO!

The price of MNR token depends on the stage of crowdsale. Only during the pre-sale second round

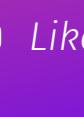

We sell it for the 0,03 USD August 15 - October 15

The price will be increased three more times November 4, November 18 and December 2

The tokens will worth 0,04 USD October 20 - November 3

So, on the final stage it will worth 0,05 USD. The crowdsale ends on December 31, 2018

**Become a part of the project bringing the world of social network close to the universe of cryptocurrencies**
